

The Nuclear Cloud and Israel

July 19, 2015

On the morning of July 19, 2015 I saw a startling sight in the morning sky!
The sun was rising and took the shape of the mushroom cloud from a nuclear detonation.
I took the following picture:

Later I began noticing an anomaly in the picture.
Above the cloud and to the left there appears to be some writing.

I know it's hard to see, but here is what I see:

The letters "ISR" are plainly visible. ISR is the three letter abbreviation for Israel.

If you look closely you can see that ISR is followed by a barely visible "A", and the top and bottom lines of the letter "E". The A and E are barely perceptible.

I have modified the color in an effort to aid in observation.
